Track your business to stay on top of your industry

Imagine always knowing where your assets are or when they are in use. With IoT-tracking devices and data loggers from Trusted, you can!

Across industries, our tough, durable devices and intelligent software solution provide insights that help you solve your business challenges.

Many industries, one solution

The Trusted tracking solution is tailormade for industry. Customers in logistics, construction, wind power, rental, and theft protection have all found us as the solution to their tracking and data logging needs.

This is because we know your industry and can help address your business challenges. Our specialists can customize tracking solutions to suit exactly your needs.

At our core is our tough, durable tracking device with a long battery life. Easy to install on assets and machinery, it fuels our software solution with data displayed in graphs, lists and on maps ready for analysis and with an option for export through API and Excel.

Let us help you with your tracking needs, **contact our specialists**!

Your success is our goal

Our customers in theft protection report of recovery rates of more than 90 percent of stolen assets.
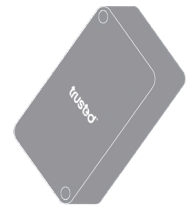

Construction site managers are in control of the utilization of machinery and can react instantly if valued assets are removed from sites outside specified hours.

Logistics managers in transport industries and sectors like wind energy never lose track of shipments, by following their cargo to an almost unheard degree of detail with data like position, shock, tilt and temperature.

Now, how can we help you optimize your business?

Device	T7LTE	T8LTE	T9LTE	T10LTE
Characteristics	Small frame	Flight-approved	Long durability	Extreme durability
Battery life, typically	4000 transmissions	2900 transmissions	7000 transmissions	10000 transmissions
Network	LTE/2G	LTE/2G	LTE/2G	LTE/2G
Dimensions	68 x 68 x 25 mm	68 x 68 x 28 mm	112 x 68 x 39 mm	112 x 68 x 44 mm

Sensors

	Motion	Shock	Light	Temperature
	Radio Beacon	GPS	Humidity	External tags
	Tilt	Battery		

Software

	Utilization	Data analysis	Alarms	Flight mode
	Log function	Geo sites	Dew Point	Schedule

Accessories

	RHT TAG	ID TAG	Magnet small Magnet large	Screw kit
