

IoT data tracking and asset monitoring

Wireless IoT hardware. Online data software. Complete data monitoring solution.

Construction

Monitor running hours.
Effective theft protection

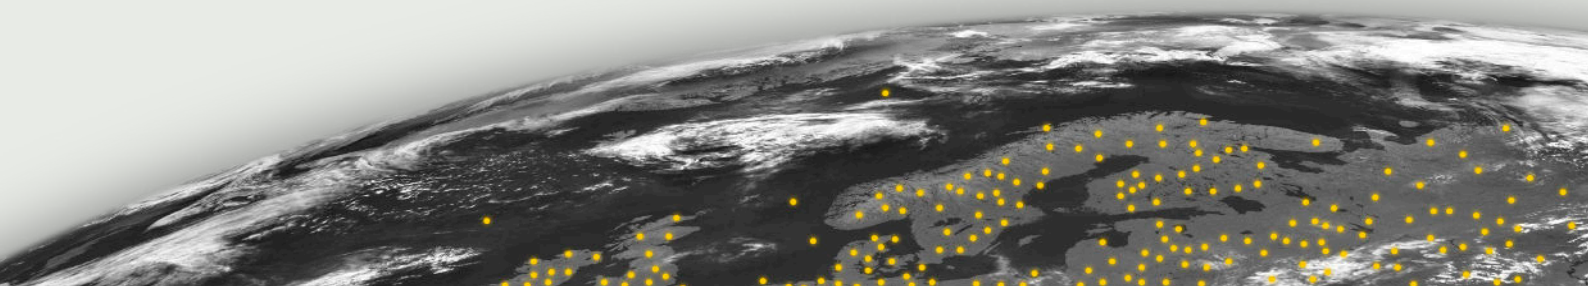

IoT hardware. Online software.

Robust IP69k wireless hardware
Advanced sensors. Data online.

Transport and installations

Compliance. Safe transport.
Effective fleet management

Our solutions and services

Trusted A/S provides data monitoring and tracking solutions used by clients worldwide.

We develop and produce IoT hardware built to monitor and send data to our online data portal for years under even the most extreme environments.

Data includes position, handling, movement, humidity and much more. This information is used for monitoring running hours, theft recovery, compliance reports on handling, etc.

About us

Based in Denmark, Trusted A/S is the winner of consecutive awards for business growth and holds an AA credit rating.

We have dealers and clients worldwide including major producers of construction attachments, security companies, and leading producers of green energy technology.

Our mission is to become the preferred supplier of advanced data tracking that helps businesses make smarter decisions and succeed.
